Detailed Action

Response to Applicant's Remarks

1. Applicant's amendment, see response, filed on May 16, 2005, with respect to claim 1 has been fully considered and is persuasive. The rejection of claim 1 and the objection of claims 2-20 have been withdrawn. The examiner acknowledges the cancellation of claim 2.

Allowance

2. Claims 1 and 3-25 are allowed. The following is an examiner's statement of reasons for allowance:

In reference to claims 1 and 21: Underwood (U.S. Patent 5,299,459) teaches a multiplexer, digitally swept-sine-wave vibration test controller employing an adaptive control method, which compensates for non-linear and time variant physical characteristics of a system under test for instrumentation errors (see Underwood, Fig. 1 and column 2, lines 50-63).

Underwood does not teach an apparatus for determining characteristic of a system under test as claimed in the instant application.

The claimed invention is a method and apparatus disposed to perform electrical and electrochemical measurements that includes an excitation driver,

receiver, a response sensing preamplifier, a synchronous sampling means; and a suitable means of interconnection to a system or device under test, whereby an excitation signal may be forced or elicited to flow through the system, and the resultant conjugate response signal is detected and conveyed to the preamplifier operatively connected to a synchronous sampling means (which is a waveform bounded at each of its end points by either zero crossing corresponding to a change of relative polarity, or a zero crossing corresponding to a change of relative polarity, or by a zero amplitude value).

The remaining claims 3-20 and 22-25 are dependent upon claims 1 and 21 and contain further limitations.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
